

Mobile-1B

Cartridge Fume & Dust Collector

- × Ultra-Low Maintenance
- × Plug-n-Go Operation
- × Nominal 600 CFM
- × 99% Filter Efficiency Down to .5 Microns
- × 7-Foot by 6-Inch Flexible Arm for Precise Positioning
- × Caster Dolly Kit for Portability
- × Direct Drive 1HP High Pressure Motor Blower 115v
- × Heavy-Duty 14 and 16-Gauge Steel Construction
- × Teflon Coated Polyester Filter Cartridge (94 Square Feet)
- × Noise Rating 67dba
- × Vertical Configuration

Portable Source Capture for Fumes & Dust

Our most compact and economical fume and dust collector, the portable IAS Mobile-1B is a powerful, self-contained and low-maintenance solution for source capture of even the toughest weld fumes.

Plug-n-Go With 99% Efficiency

Ideal for intermittent duty applications, the **Mobile-1B** captures hazardous fumes and metal oxide dust from spot welding, light grinding, deburring small batching and filing applications *at the source*. The 6-inch by 7-foot articulated flex arm, with hood and adjustable damper, can be easily positioned to remove hazardous smoke and particulate *before* it contaminates the operator breathing zone.

Built to easily pass through standard doors, the highly maneuverable **Mobile-1B**

includes an outrigger dolly kit, with two locking casters. The plug-n-go configuration is ready to run with the flip of a switch.

An onboard washable Teflon-coated polyester filter features 94 square feet of filter media, handling particulate down to .5 microns.

SPECIFICATIONS

CFM	600 Nominal
Power	1HP Direct Drive 115v
Filter Cartridge	94 sq. ft. Teflon Coated Polyester
Extraction Arm	7' x 6" External Joint
Dimensions	42.5"H x 20"W x 20.1"L (Casters +5.5" each)
Weight	220 lbs
Construction	14 & 16 Gauge Steel Industrial Grade Blue
